

Status as of 1PM

General. Priority today was to bring the Parliamentary Precinct and Wellington areas “back to the people of Ottawa” through cleaning activities. This mobilizes DOB, RPS OPS and SPIB and PCL contractors, and NCRCC.

Specific actions undertaken to support that priority:

- **Fencing and barriers.** RPS OPs, SPIB and contractors (PCL) have started sequential removal of jersey barriers to clean up Wellington Street and secure the perimeter. Only jersey barriers on Wellington in the Precinct have been removed for now. OPS has requested that the barriers at the Supreme Court remain in place. Planning at the municipal level for surrounding streets was only stood up at noon (Sunday). No direction for removal or placement of other barriers at this time.
- **Parking:** Parking lots at 1500 Bronson and Charles Tupper building have been plowed and are ready for use if city needs more space as part of their cleaning efforts. Still not used. PSPC to remain on standby as they are still removing vehicles.
- **Live Cam:** OPS request that this remain off until clean-up is completed and the area has been returned to status quo.
- **Procurements:** Leveraged existing procurement vehicles to install fencing and implemented new contracts for the location of a Hotel (Coventry) for RCMP officers and the purchase of additional fencing. Identified a contractor on call for the bulk removal of jersey barriers when approved to do so. (Contractor has been assessed through DOB (IR) and has all vaccinations in place.)
- **NWM.** NCC completed the cleanup of the site. Working with RPS Ops to keep track of removed assets.
- **Regions.** DEOC has continued to monitor protestors activities taking place across the country through Regional security reports and media review.

Milestones over the weekend:

The clean-up that is ongoing is possible as a result of Police operations that regained control of the city. PSPC intensive support has paid off to make police operations easier. Namely:

Friday night to Saturday morning:

Fencing: Fence over Jersey barriers (G7 Type) was done on:

- a. Rideau and Wellington.
- b. Sussex and George.
- c. Colonel by and Daly
- d. Rideau and William (jersey barriers only)

Saturday night to Sunday morning:

Additional fencing:

- Queen and Elgin in the east, From Metcalfe to Lyon, barricades barriers established on the south-side of Sparks.

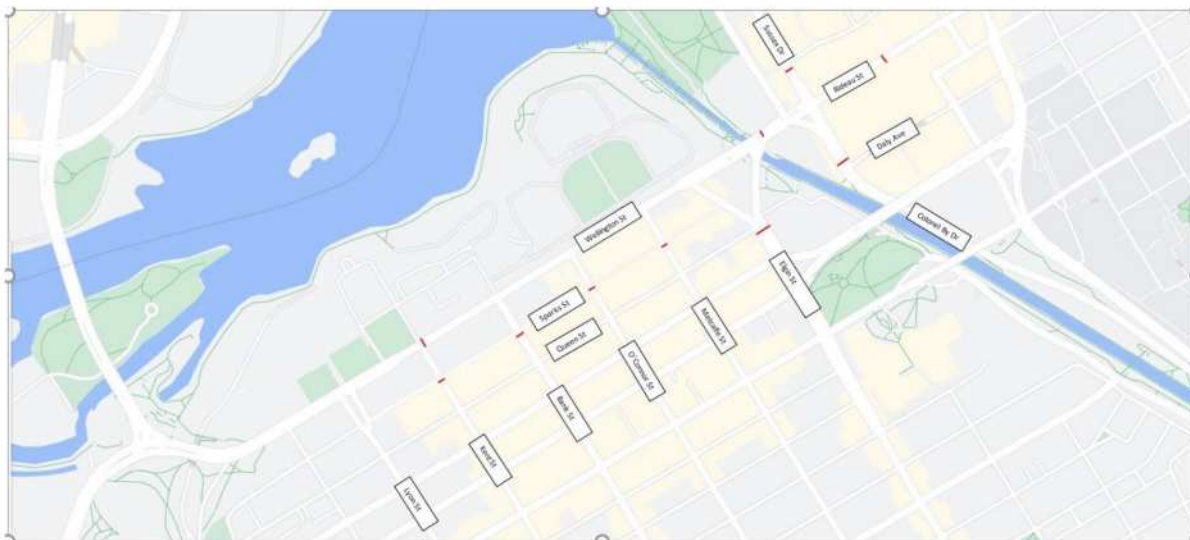

Removal of fencing:

- Removal of the 8' fence from the Wellington Wall from the canal entrance to Confederation Building. Also moved bicycle barricades, cement blocks and signs from the fencing along the Wellington Wall and the crowd control barricade on the Hill.

Other measures:

- Security of our employees and contractors who were required to be on site over the weekend was coordinated with NCRCC to ensure their safety at all times.
- We temporarily closed off air take in buildings as a precautionary measure while police operation was underway (Caroline – checking)
- On Feb 19th between 12:45 – 3:45 pm (EST) , all federal buildings in the Parliamentary precinct area were placed on “hold and secure mode” (*Shelter-in-Place*). This created challenges for interpreters replacing their colleagues for the noon-shift as they were precluded from entering West Block. This was mitigated by sending them to the Slater office while others already onsite continued to offer services.
- As of Feb 19th 5:30 pm (EST) the “hold and secure mode” was lifted and all federal buildings in the secure perimeter were put back on “restricted access-weekend mode (access card only).
- Interpreters have supported the activities taking place in the House as they debate the Emergency Measures Act. They attended throughout Saturday, despite the police operations and are again in place today as required.
